Dept. of Computer Science and Engineering, SUST

PROFILE SUMMARY

Results-driven Computer Science and Engineering student (SUST, CGPA 3.52) with proven ability to design and build full-stack applications, RESTful APIs, and data-driven systems. Strong grasp of data structures, algorithms, and software engineering best practices, backed by hands-on project experience across web development, real-time systems, and machine learning. Currently working as an AI Trainer (Reviewer) at Outlier, evaluating LLM outputs for quality and accuracy. Recognized for strong analytical skills, including 4th place in the English Olympiad, Dhaka. Seeking a Software Developer role to deliver scalable, high-quality solutions in a collaborative team environment.

TECHNICAL SKILLS

Programming Languages: C, C++, Python, Java, JavaScript, Dart, SQL

Web & Mobile: React.js, Tailwind CSS, FastAPI, Flutter, HTML, CSS

Databases & Cloud: MySQL, PostgreSQL, SQLite, Supabase, Firebase, Cloud Firestore

Core Competencies: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, REST API Design

Tools & Platforms: Git, GitHub, VS Code, Postman

PROJECTS

Hishabi (হিসাবী) — Personal Finance & Mess Management App | Flutter, Dart, Firebase, Cloud Firestore, Firebase Authentication, Google Sign-In

- Built a cross-platform personal finance and mess-management app with Flutter and Firebase, covering daily/monthly expense tracking, budget management with near-limit warnings, and PDF expense reports.
- Designed mess and meal workflows including member management, meal tracking, bazar duty rotation, shared expense calculation, and Dena-Pawna (dues/payables) and loan tracking.
- Integrated Firebase Authentication with Google Sign-In and Cloud Firestore for cloud data synchronization across Android and web, and added AI-assisted expense insights.

[GitHub](#) | [Live Demo](#)

CourierExpress — Full-Stack Courier Management System | React, Vite, Tailwind CSS, FastAPI, SQLAlchemy, SQLite, JWT

- Developed a full-stack courier platform with a React frontend and a FastAPI REST backend, supporting parcel booking, automatic delivery-charge calculation, and public parcel tracking via unique tracking codes.
- Engineered JWT authentication with bcrypt password hashing and role-based access control for users and admins, plus single-use, expiring password-reset links sent through the Brevo email API.
- Built an admin dashboard with search, filtering, sorting, parcel status updates, and CSV export, backed by SQLAlchemy models and Pydantic schemas; deployed the frontend on Netlify and the backend on Render.

[GitHub](#) | [Live Demo](#)

Expense Tracker API | Python, FastAPI, PostgreSQL, Supabase, JWT, OAuth2

- Built a RESTful API for personal expense management with FastAPI, supporting transaction management backed by a PostgreSQL database hosted on Supabase.
- Secured endpoints with JWT-based authentication and OAuth2 authorization to restrict access to user-specific data.
- Organized the codebase into modular routers, models, and database layers, with a dedicated test directory.

[GitHub](#)

FastAPI Todo App | Python, FastAPI, Alembic, SQLite, PostgreSQL, MySQL

- Developed a RESTful todo management backend with FastAPI, exposing structured endpoints for CRUD operations with authentication.
- Managed database schema changes with Alembic migrations and provided SQL setup scripts for both PostgreSQL and MySQL.
- Structured the application into separate router, model, and database modules.

[GitHub](#)

Movie Collection API | Python, SQLite, REST API

- Developed a backend API in Python for managing movie collection data through structured RESTful endpoints.
- Modeled movie entities and persisted them in a SQLite database using separate model and database modules.

[GitHub](#)

API Project | *JavaScript, HTML, CSS*

- Built a client-side web application using JavaScript, HTML, and CSS, with markup, styling, and logic separated into dedicated files.
 - Implemented API-driven functionality in a lightweight, framework-free front end.
- [GitHub](#)

EXPERIENCE

AI Trainer (Reviewer) | Outlier (Remote)

- Review and evaluate AI-generated responses for accuracy, reasoning quality, instruction-following, and safety against detailed project guidelines.
- Audit work submitted by other AI trainers, providing structured feedback to maintain consistent, high-quality training data.
- Identify errors, edge cases, and hallucinations in model outputs, and write clear rationales to support model improvement.
- Apply strong analytical and written English skills to meet quality and turnaround benchmarks in a remote, self-managed workflow.

EDUCATION

Bachelor of Science in Computer Science and Engineering	CGPA: 3.52 2025 – Present
Shahjalal University of Science and Technology (SUST)	
Higher Secondary Certificate (HSC)	2024
BPATC College, Savar, Dhaka	

ACHIEVEMENTS & LANGUAGES

- 4th Place, English Olympiad, Dhaka — recognized for excellence in English language proficiency among a large pool of competitors.
- Languages: Bangla (Native), English (Proficient)
